DETAILED ACTION

1. It is noted that applicant did not provide an English translation of the foreign priority applications (Japan 2003-430064, Japan 2004-199898, Japan 2004-199899, Japan 2004-199900).

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- i. Group I, claim(s) 1-8 are drawn to an aqueous coating composition comprising acrylic resin and silica sol.
 - ii. Group II, claim(s) 9-19 are drawn to an aqueous coating composition comprising binder constituted by a synthetic resin.
3. The inventions listed as groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Aqueous coating composition comprising a synthetic resin and silica sol in instant invention appear to be the common feature of groups I and II. However, aqueous coating composition comprising a synthetic resin and silica sol is not novel in view of "X" reference of international search report (JP 2004-075757) and (JP 11-246826). Therefore, novelty of the instant invention appears to be the non-common limitation of claims of group I and II i.e. binder constituted by a synthetic resin emulsion.

4. A telephone call was made to Dan Altman on June 8, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants

or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
